E51D North Cook RIB DXpedition –now QRT

E51D RIB DXpedition went QRT on Sep 8 at 1820 UTC. We made 56,970 QSO-s from a very small footprint and with only four local operators. Statistics will be published later on the E51D QRZ.com page. We appreciate the overwhelming support of the HAM community. We could not work everyone, but we sure tried...We also thank the Northern California DX Foundation, whose support resulted in the development of the RIBs. This is DXpedition technology that helps the entire Amateur Radio community. We ask those who can help to support the NCDXF so they can foster the developments that are essential in today's changing regulatory and technological environment. This kind of activity and support are crucial to future of Amateur Radio.
